HIGHLIGHTED PROGRAMING AI TOOL (WEBSITE CREATION)

FRAMER

What is Framer?

1

- Framer is a tool for making websites.
- You do not need to know coding.
- You can make a website by drag and drop and by using AI to help you.
- from Amsterdam

2

How to Use

- Go to the website: www.framer.com
- Create an account
- Start a new project
- Use the AI website generator (write a short sentence, e.g. "website for a youth exchange with 3 pages")
- AI creates the first version of the website
- Edit the text, colors, photos, and layout
- Click Publish to put the site online
- No coding is needed.

How It Can Be Applied in a Youth Organisation

3

Youth organisations can use Framer to:

- Make websites for projects, youth exchanges, events, workshops
- Share information for young people in a clear way
- Show project results, photos, videos, stories
- Help young people create portfolio websites for jobs or Erasmus+
- Promote activities and opportunities quickly and professionally

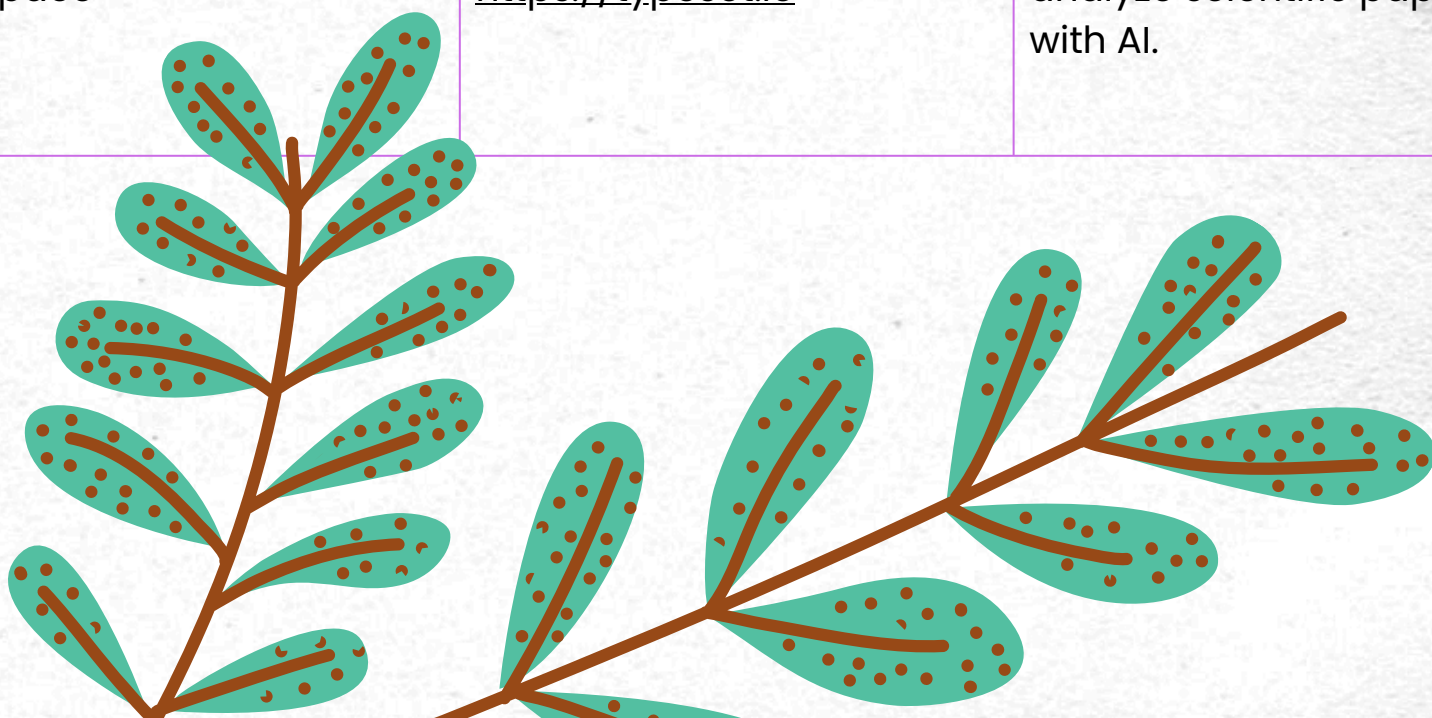

Use Framer for:

4

- Project websites
- Event pages (trainings, workshops, mobility info)
- Registration pages for participants
- Online portfolios for young people
- Showcasing results of Erasmus+ or ESC projects
- Quick landing pages for campaigns or announcements
